Rutherford's Atomic Model Quiz

Physics • Grade 11

Student Name: _____ **Date:** _____ **Score:** ___ / 7

Read each item carefully and answer.

Part A: Choose the right answer

Tick one box.

1. Who proposed the Rutherford's atomic model?

- ☐ **A.** Niels Bohr
- ☐ **B.** J. J. Thomson
- ☐ **C.** Ernest Rutherford

2. Which scientist proposed the Rutherford's atomic model?

- ☐ **A.** J. J. Thomson
- ☐ **B.** Ernest Rutherford
- ☐ **C.** Niels Bohr

3. In Rutherford's model, what is the central part of the atom called?

- ☐ **A.** nucleus
- ☐ **B.** proton shell
- ☐ **C.** electron cloud

Part B: True or false

Tick True or False.

4. The Rutherford's atomic model includes a nucleus.

☐ **True** ☐ **False**

5. The Rutherford's atomic model includes a nucleus with positive charge.

☐ **True** ☐ **False**

Part C: Fill in the blank

Choose a word from the word bank.

6. In the Rutherford's atomic model, the positive charge is located in the _____.

Word bank: **nucleus cloud electron**

7. The _____ of the atom is positively charged and contains most of the atom's mass.

Word bank: **proton nucleus electron**

Answer Key

Teacher copy • Rutherford's Atomic Model Quiz

1. C. Ernest Rutherford — Ernest Rutherford proposed the Rutherford's atomic model.

2. B. Ernest Rutherford — Ernest Rutherford proposed the Rutherford's atomic model.

3. A. nucleus — The central part of the atom in Rutherford's model is called the nucleus.

4. True — The Rutherford's atomic model includes a nucleus.

5. True — The Rutherford's model includes a nucleus with positive charge.

6. nucleus — The positive charge in the Rutherford's atomic model is located in the nucleus.

7. nucleus — The nucleus of the atom is positively charged and contains most of the atom's mass.
