Rutherford's Atomic Model

Braille Cards • Physics • Grade 11

Dot patterns are drawn so you can check them and use them with a braille embosser. Please have a braille reader check them before classroom use.

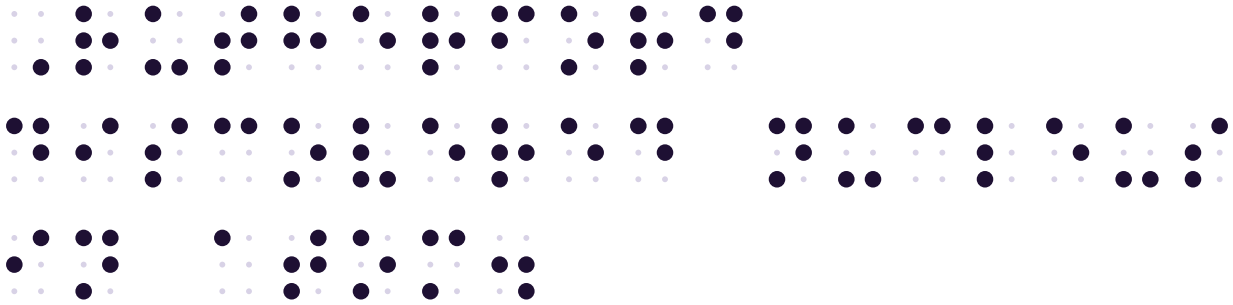

Title

Rutherford's Atomic Model

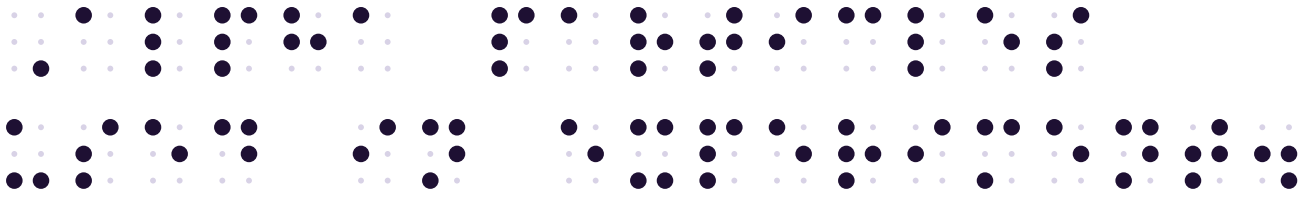

Key point 1

Rutherford discovered nucleus in atom.

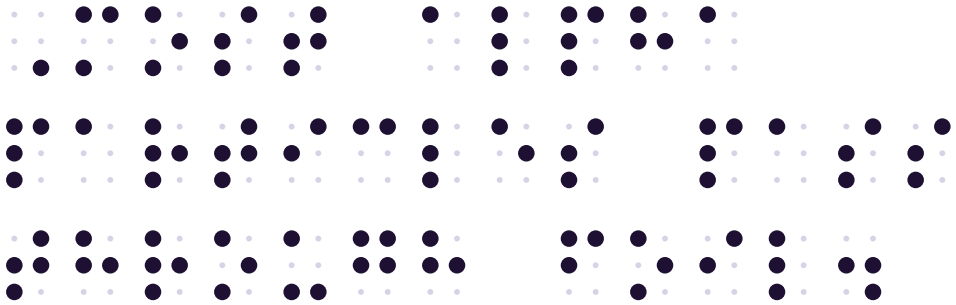

Key point 2

Alpha particles used in experiment.

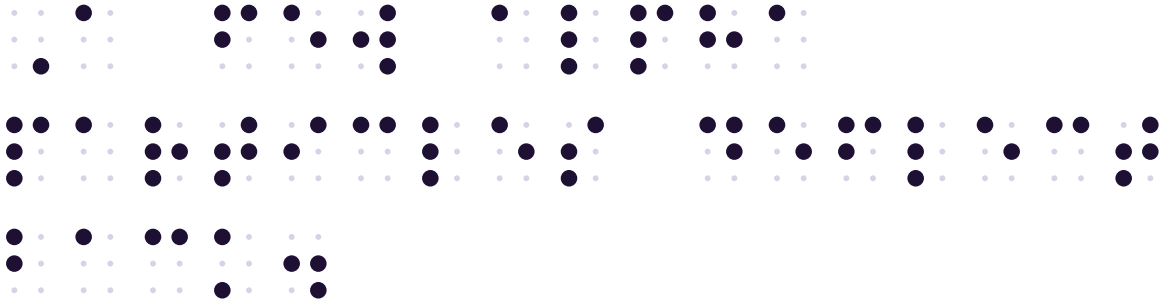

Key point 3

Most alpha particles pass through foil.

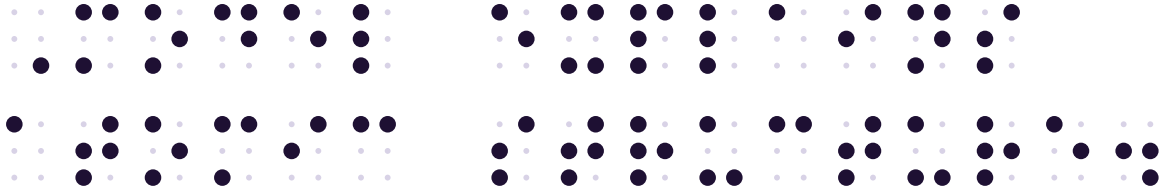

Key point 4

A few alpha particles deflect back.

Key point 5

Model explains atomic structure.

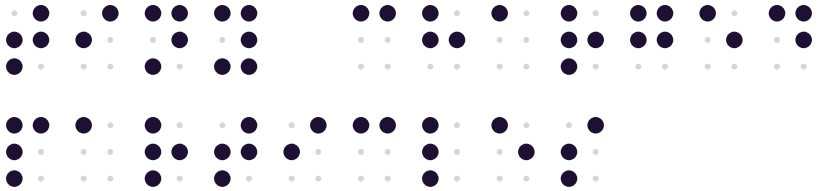

Key word 1

alpha particles

tiny charged particles

Key word 2

foil

thin metal sheet

Key word 3

nucleus

center part of atom

Key word 4

deflect

change direction
